

# CANNABIS IS A RISKY BUSINESS...

## WHEN RISK BECOMES A REALITY, ARE YOU PREPARED TO MINIMIZE THE IMPACT?

National Cannabis Risk Prevention Services provides solutions designed to mitigate and eliminate threats that can be detrimental to your business goals, brand, reputation and the overall success of the legal cannabis industry as it continues to grow.

## WHAT WE OFFER

Tools, procedures, knowledge and support developed in direct response to lessons learned in both new and mature cannabis markets:

- Innovative Risk Assessments
- Certified Risk Managers
- Education, Training & Consultation

## ABOUT US

Positioned across the country, our Certified Risk Managers are renowned risk experts and professionals with a genuine passion for cannabis.

This powerful combination generates an unparalleled level support designed to prepare businesses for long-term success and business owners with peace of mind.

# THE ONLY ASSESSMENT TOOL OF ITS KIND

---

Most of the risks cannabis businesses face do not have legal standards or guidelines for prevention. This doesn't mean that the risks aren't there. NCRPS believes that the most comprehensive and holistic way to identify risks before they surface is through assessment. As a result, we developed an innovative, proprietary tool:

## Cannabis Risk Prevention Platform.

### PURPOSE BUILT FOR THE INDUSTRY

---

#### SCORECARD

CRP<sup>2</sup> outputs a ScoreCard showing the health status at the end of each risk assessment.

#### REPORT

A detailed report shows where each entity has room for improvement and how to improve it.

#### IMPROVEMENT

Once risk sources are identified, NCRPS gets to work on customized solutions to further improve your risk mitigation performance.

#### HISTORY

With follow up assessments, CRP<sup>2</sup> creates a detailed history of how things improved.
